If you've ever wished you could just put a microphone into your pets' heads, so you could know what they're thinking, then get ready to transform your relationship with your pets forever.

Val got her start in animal communication in 1993 when an injured mare spontaneously told her why the wound on her hip wouldn't heal.

Through the conversation, Val and the owner were astonished as the wound simply disappeared right before their eyes.

Profoundly moved by the experience, Val immediately knew that this was her life's work, and she wanted to be the best animal communicator.

Her specialty is healing and solving problems with pets through a uniquely powerful spiritual journey.

Her mission and passion is to reach and teach One Million Animal Lovers around the world, improve the lives of animals the world over by helping humans learn how to speak their language, understand their viewpoints, and heal.

After all, it's our love of animals that helps us learn how to be better humans.

A motivational and keynote speaker and bestselling author, she's also the Founder of the **HEART System**, a 5-step program solving healing, training, behavior and performance issues with horses, dogs & cats.
